

Course Outcome Guide (COG)

Course:	CD 222 Articulatory/Phonological Disorders	Credits:	3 (online)	Instructor:	Thomas Linares
Course Description:	CD 222 has been specifically revised to address the needs of the SLPP student in training for the public schools. Consequently, this class will particularly study the normal development of articulation and phonology which is needed by the SLPP student. Secondly, a basic introduction of disorders of articulation and phonology will be presented. Thirdly, treatment of articulation and phonological disorders will be emphasized since therapy is a major responsibility of the SLPP in the public schools. Students will be required to read each chapter assigned, along with the lecture notes. Assignments will be given, and use of the discussion board online is required of each student. A test will be given after each chapter.				
Concepts and Issues	Process Skills	Assessment Tasks	Intended Outcomes		
			Course	General Education or Program	Institutional
1 Development of Articulation and Phonological Skills	1 Student will study speech development from the prelinguistic level to the phonological awareness level	1 Written examinations	1 Student will be able to describe prelinguistic sounds, babbling, jargon, as well as describe speech and phonological patterns and awareness	1.
